Update of first milestone of Co-vida team

Hi professor and TAs.

Sorry for the late update.
On the day of Dec 8, our team has finished one of our project's key milestones which we set up to build all the fundamental features(most front-end) that meet our initial goals.

Here is how those main functionalities look like.
Data Page: At this page we build a chart to provide the live data of COVID-19 cases. (Chart is shown below)

USA Covid Cases

Last Updated: **Dec-08**

Confirmed	Deaths	Recovered
15165159	286249	5786915

Update of second milestone of Co-vida team

Hi Professor and TAs.

Till yesterday 12/11/2021, our team has finished the second milestone of our project which is to set up the back-end server using Node.js, Express.js and mongoDB .
We built a community where people can share their thoughts about pandemic.
Here is a part of the website about how it works.

Community

See how people think about Covid-19 here
